

Outlet throttle, article DRSD and DRSN

Outlet throttle including silencer for regulating the operating times of pneumatic rotary actuators. The mounting is done in the air outlets of the NAMUR solenoid valve.

With the knurled screw, article DRSD or with the screwdriver, article DRSN the cross-sectional bore of the outflowing air quantity of the solenoid valve is changed.

For double acting pneumatic actuators with NAMUR solenoid valves mounted, the control speed can be regulated "OPEN" and "CLOSE" in both directions. For single acting actuators only in the spring direction.

article DRSD and DRSN outlet throttle

size	G 1/8" / G 1/4"
working pressure	0,5 ... 10,0 bar
temperature range	-20° C up to +80° C
materials	sintered metal on brass screw connection

design	order-number
DRSD G 1/8"	457.8635.1.60
DRSD G 1/4"	457.8635.1.61
DRSN G 1/8"	457.8632.1.60
DRSN G 1/4"	457.8632.1.61
